### **Testimonial**

Abbott has been working with daman|it for while now but my cooperation with the company started in the fall of 2008. daman|it were already working with our Danish affiliate providing them with external web development and consultancy services. My need last year was a little different! I was looking for an organization that would help us with our intranet – not just as a development shop but as a partner to help build a foundation that all of our affiliates could use. This is where Andreas and his team have really come into their own. We are currently working with them to build a template that can grow and develop with the business.

We have also asked daman|it to present to our Regional Leadership Team; we wanted to hear their vision of how technology will impact the healthcare industry. This proved very successful and their insight has been invaluable in starting to help us shape how we will engage with our stakeholders in the future.

daman|it is a small but very dependable company. They are ambitious but honest and will always give you the facts. I look forward to a long and fruitful business relationship with daman|it.

Kind Regards

Phil Wood
